Yogyakarta

Final year undergraduate Informatics student with a strong interest in mobile application development using Flutter. Possesses a solid understanding of developing responsive, efficient, and user-centered applications, with foundational knowledge of user interface design, state management, and REST API integration. Continuously expands technical skills by independently learning new technologies through various projects and quickly adapts to the challenges of software development. A highly motivated learner with strong teamwork skills and a commitment to delivering high-quality software solutions.

Jenjang Pendidikan

Universitas Teknologi Yogyakarta - Yogyakarta

Sep 2023 - Aug 2027 (Perkiraan)

Bachelor of Informatics, 3.86/4.00

SMK Negeri 2 Depok Sleman - Yogyakarta

Jul 2019 - May 2023

Senior High School, Information Systems, Networking, and Applications (SIJA)

Work Experience

TIKI KUDUS - Kudus

Jul 2022 - Apr 2023

IT Support & Administrative Intern

- Developed an internal web application to support the company's operational processes and data management.
- Operated the company's logistics information system to manage shipment data and update package statuses.
- Validated, updated, and consolidated operational data to ensure the accuracy and consistency of information within the system.
- Provided technical support, including basic troubleshooting and computer maintenance, to ensure smooth day-to-day operations.
- Collaborated with the operations team to manage operational data and resolve operational issues efficiently.

Other Experience

Lecture Assistant

Feb 2026 - Jun 2026

Mobile Application Programming

- Assisted the lecturer in conducting Mobile Application Development laboratory sessions for two classes.
- Mentored students in developing mobile applications using Flutter, covering Flutter fundamentals, development environment setup, UI development, navigation, state management, Firebase, and REST API integration.
- Provided technical guidance on code implementation, debugging, and software development best practices.
- Supervised students in developing dynamic Flutter-based mobile applications integrated with REST APIs as their final group projects based on their respective case studies.

Certifications & Skills

- Cognitive Class** (2025): Data Analysis with Python
- Programming Languages:** Dart, PHP, JavaScript, Python
- Frameworks:** Flutter, Laravel, Express.js, Next.js, Django
- Databases:** MySQL, PostgreSQL, Firebase
- Tools & Platform:** Git, GitHub, Visual Studio Code, Android Studio, Postman, Figma, Docker
- Soft Skills:** Leadership, Problem Solving, Communication, Teamwork, Adaptability
